On October 13, 2005 Montana Fish, Wildlife & Parks (MFWP) released a Draft Environmental Assessment (EA) for public review and comment concerning a proposal to develop initial recreational improvements at the newly established Brush Lake State Park. Brush Lake is located approximately 31 road miles southeast of Plentywood. Specific recreational improvements proposed in this project would include the rerouting and upgrading of an entrance/interior road, a gravel parking area, boat ramp and boat dock, a vault latrine, designated swimming area, picnic tables and fire rings.

At the conclusion of a thirty four-day public comment period, the Glasgow office of MFWP received three letters in reference to the proposed improvements and the

environmental impacts. Two of the 'comment letters' were supportive to see the presence of recreational facilities at the north end of Brush Lake State Park.

The U.S Fish & Wildlife Service (USFWS) office at Medicine Lake National Wildlife Refuge Complex, Medicine Lake, Montana, offered specific comments in reference to the text of the Draft EA. Overall the comments from the USFWS run parallel with the recreation management goals and environmental protection MFWP desires to commit.

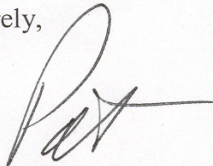

A portion of the USFWS input questioned whether the Draft EA addressed the long-term impacts that the proposed improvements will have with the influx of visitation into the area. It is the intent of MFWP for the EA to address the impacts of the construction of the improvements and the long-term impacts of the recreational use in the area. Therefore, the Final EA has been restructured to emphasize the environmental impacts the users will bring about to the park and surrounding area, along with measures of mitigation.

By notification of this Decision Notice, the Draft EA is hereby made Final with modifications suggested by the USFWS. Copies of the Final EA are available at the Glasgow office of MFWP.

The Department recommends proceeding with the development of recreational improvements at the north-end of Brush Lake State Park. We expect that the proposed facilities will be available for public use by July of 2006.

If you have any questions regarding the proposal and the final decision, please contact me at the Glasgow office, 228-3700.

Sincerely,

A handwritten signature in black ink, appearing to read 'Pat', with a long horizontal stroke extending to the right.

Pat Gunderson
Region 6 Supervisor
